

## Overview

---

Full Tilt is a division of DistributionNOW based in Canada, specializing in mechanical field service, articulating and boom cranes, and custom truck deck systems and service bodies. Through our Full Tilt field service base in Lloydminster, AB, DistributionNOW provides a "one stop" experience for these capabilities, with a focus on superior customer service.

## Products and Services

---

### Field Service

We employ well-equipped and well-stocked service trucks to ensure our customers are back up and running as fast as possible. We take pride in our response time, and we are prepared to endure the severest of conditions in order to satisfy our customers' requirements. We understand that restoring equipment operation is a top priority, and we endeavor to make this a top priority.

### Cranes and Truck Decks

In addition to our industry-leading field service, Full Tilt has full lines of articulating and boom cranes from world class manufacturers. We stock and engage cranes from 2 ton ability all the way to massive 50 ton cranes. These crane smart systems can be adopted with our custom manufacturing of truck decks and IMT service bodies, in addition to air compressor systems and VMAC under-hood compressors.
